

Thousands of Organizations Trust Their Cyber Defense to Secureworks, a Leader in MDR

Secureworks® Taegis™ cybersecurity solutions combine human and artificial intelligence to deliver superior detection and unmatched response.

Working with Secureworks, leveraging their XDR platform and expertise through their MDR offering, has been a phenomenal experience.

Tony Bryson CISO, Town of Gilbert, Arizona

Secureworks Taegis Platform

Taegis ManagedXDR, the Secureworks Managed Detection and Response (MDR) solution, delivers the power of the Taegis XDR platform with the addition of a tailored MDR approach. Designed to reduce risk, protect investments, and fill talent gaps, this solution provides extensive security expertise, delivering over 400% ROI on average. The MDR solution includes 24/7 live chat, with access to real security experts (not a ticket system) in under 90 seconds.

Taegis XDR is an open-without-compromise SaaS solution designed to hunt, detect, and respond to threats. Taegis XDR pulls telemetry from all sources, using automated alerting, patented analytics, and proprietary real-world threat intelligence to bolster security maturity and improve security outcomes. Taegis can integrate with existing EDR agents or deliver its own agent at no additional cost.

INDUSTRY RECOGNITION

2024 Frost & Sullivan Global Extended Detection and Response Competitive Strategy Leadership Award

2023 Frost & Sullivan Leader for XDR, Frost Radar

2023 Frost & Sullivan Competitive Strategy Leadership Award for Vulnerability Management

2023 Leader in the Forrester Wave: Managed Detection and Response Services in Europe (Q4)

2023 Strong Performer in the Forrester Wave: Managed Detection and Response (Q2)

2023 Leader in Cybersecurity Incident Response, GigaOm Radar Report

Taegis Next Generation Antivirus (NGAV) adds robust NGAV capability to Taegis XDR, using machine learning to block threats and endpoint attacks, while providing greater endpoint context for investigations.

Taegis XDR with Log Management provides predictable, cost-effective pricing with flexible data retention options to amplify alert investigations, threat hunting, and reporting. Taegis XDR includes one year of data retention, with options to expand retention further.

Taegis ManagedXDR Enhanced delivers higher-touch threat analysis and orchestrated response with 24/7 coverage from Enhanced security analysts, threat and phishing investigations, customer tool support, and governance and advisory support.

Taegis ManagedXDR Elite is a powerful threat-hunting add on that includes continuous proactive managed threat hunting, delivered via a designated threat hunter who meets with customers bi-weekly to discuss findings and make mitigation recommendations.

Taegis ManagedXDR for OT helps defend against the latest threats to your IT and OT environments with comprehensive threat monitoring, detection, intelligence, and collaborative response.

Taegis IDR is an identity threat detection and response solution that continuously monitors your environment for identity risks and misconfigurations while providing dark web intelligence on compromised credentials.

Taegis NDR monitors traffic across your network to prevent, detect, and respond to threats, and seamlessly integrates with the open Taegis XDR platform for more holistic protection.

Taegis VDR provides a risk-based approach to vulnerability management, prioritizing the most critical vulnerabilities informed by context from your environment and constantly updated threat intelligence.

Secureworks Services

Ransomware Readiness Assessment blends broad security expertise with current research to offer a full examination of ransomware defense and incident readiness.

Threat Hunting Assessment provides a complete picture of your environment to find undetected threats, uncover security control gaps, and improve visibility.

Vulnerability Assessment finds vulnerabilities and prioritizes remediation using Taegis VDR analytics and the latest threat intelligence from the Secureworks Counter Threat Unit™ (CTU).

Penetration Testing mimics real-world adversaries to help you find blind spots before threat actors can and enhances your overall security posture.

Adversary Exercises use evolving, real-world adversary tactics to find gaps in your detection and prevention, with hands-on exercises based on CTU™ customer engagements and research.

Application Security Testing uses specialized expertise to conduct thorough security evaluations across your web applications, mobile applications and web services.

Emergency Incident Response (EIR) responds to emergencies, quickly and effectively restoring normal operations while strengthening your security posture against future attacks.

Incident Management Retainer (IMR) uses a comprehensive approach to elevate your cybersecurity posture and ensures rapid response to a potential incident.

Secureworks®

Secureworks® (NASDAQ: SCWX) is a global cybersecurity leader that secures human progress with Secureworks® Taegis™, a SaaS-based, open XDR platform built on 20+ years of real-world detection data, security operations expertise, and threat intelligence and research. Taegis is embedded in the security operations of over 4,000 organizations around the world who use its advanced, AI-driven capabilities to detect advanced threats, streamline and collaborate on investigations, and automate the right actions.
